

MODUL 4 Kali Linux

12. membuka vmware workstation

Pilih player -> file -> open -> file kali linux anda yang type .vmx lalu klik open

Jika RAM diatas 4GB coba klik edit vitrual machine settings

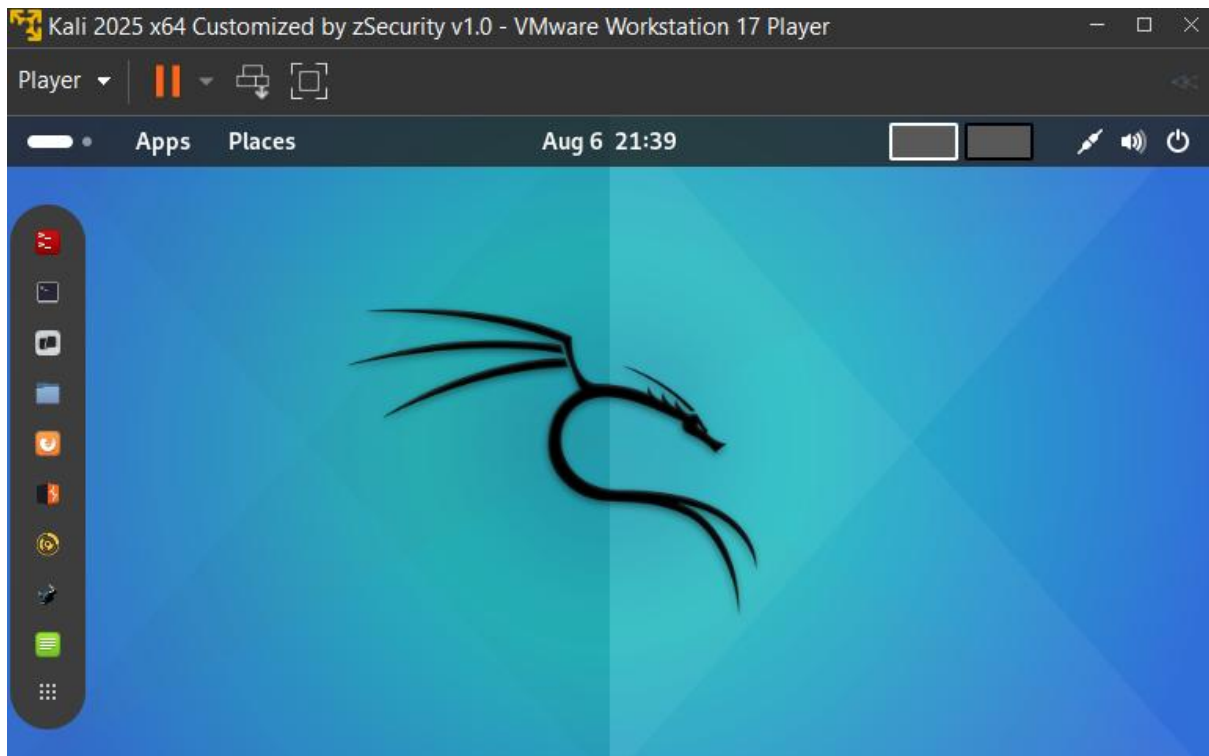

Seret ke 4GB dan klik ok

Dan sekarang kita start di tombol segitiga. Lalu tunggu sampai muncul form login. Isi username **root** dan password **toor**

*jika tampilan polos hitam coba ketik power -> restrat guess

Maka tampilan akan seperti ini

13. pengenalan kali linux secara mandiri

14. mengenal terminal

Pwd = posisi anda

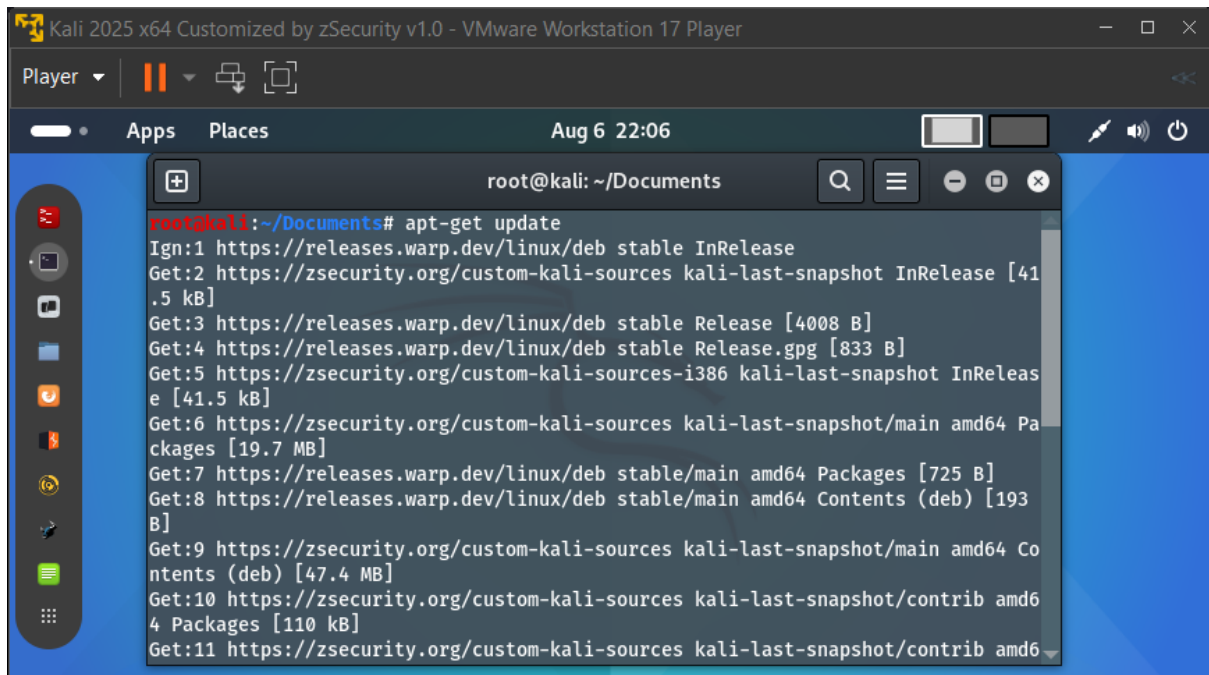

Ls = melihat isi

Ls -l = melihat isi tapi posisi kebawah

Ls -a = melihat isi yang tersembunyi

15. menginstall aplikasi melalui terminal

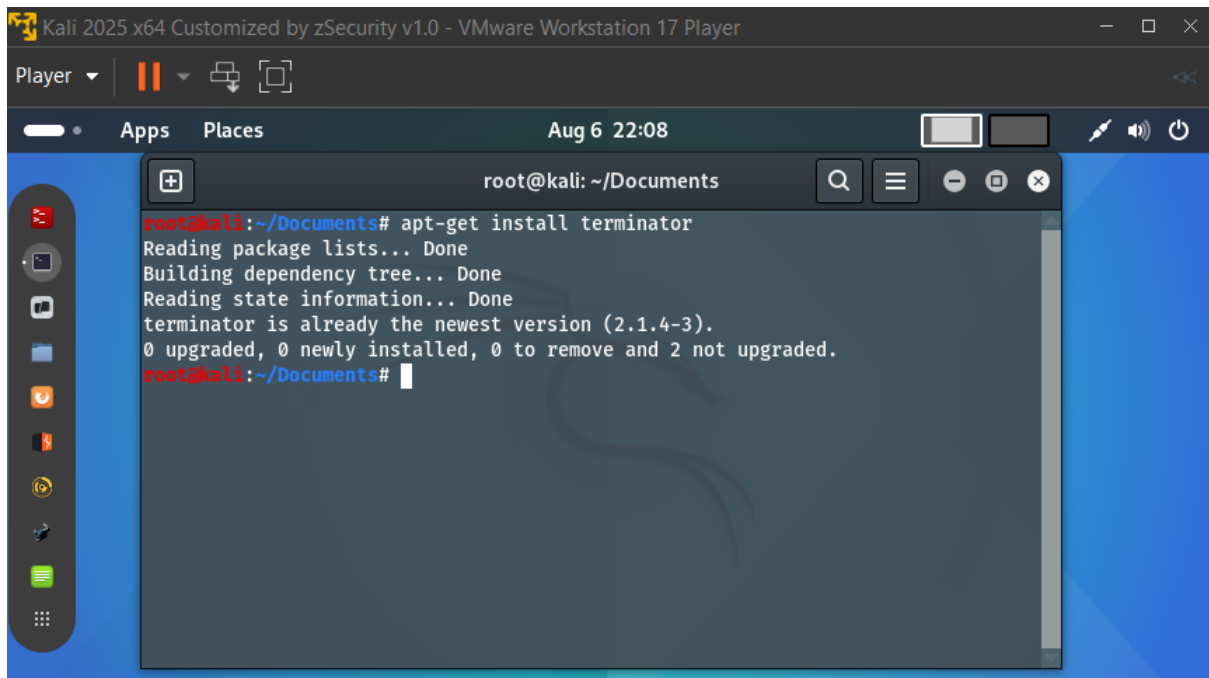

Apt-get update

```
root@kali: ~/Documents
root@kali:~/Documents# apt-get update
Ign:1 https://releases.warp.dev/linux/deb stable InRelease
Get:2 https://zsecurity.org/custom-kali-sources kali-last-snapshot InRelease [41.5 kB]
Get:3 https://releases.warp.dev/linux/deb stable Release [4008 B]
Get:4 https://releases.warp.dev/linux/deb stable Release.gpg [833 B]
Get:5 https://zsecurity.org/custom-kali-sources-i386 kali-last-snapshot InRelease [41.5 kB]
Get:6 https://zsecurity.org/custom-kali-sources kali-last-snapshot/main amd64 Packages [19.7 MB]
Get:7 https://releases.warp.dev/linux/deb stable/main amd64 Packages [725 B]
Get:8 https://releases.warp.dev/linux/deb stable/main amd64 Contents (deb) [193 B]
Get:9 https://zsecurity.org/custom-kali-sources kali-last-snapshot/main amd64 Contents (deb) [47.4 MB]
Get:10 https://zsecurity.org/custom-kali-sources kali-last-snapshot/contrib amd64 Packages [110 kB]
Get:11 https://zsecurity.org/custom-kali-sources kali-last-snapshot/contrib amd64
```

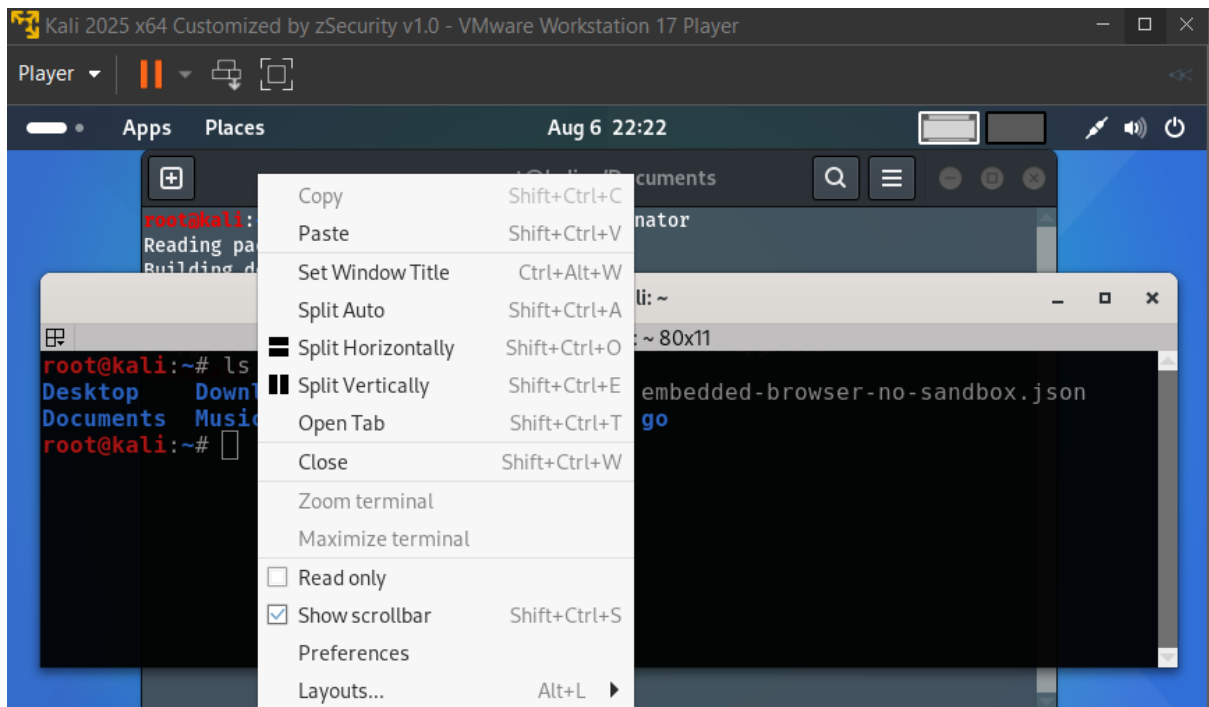

Apt-get install namaaplikasi

Contoh seperti gambar ini

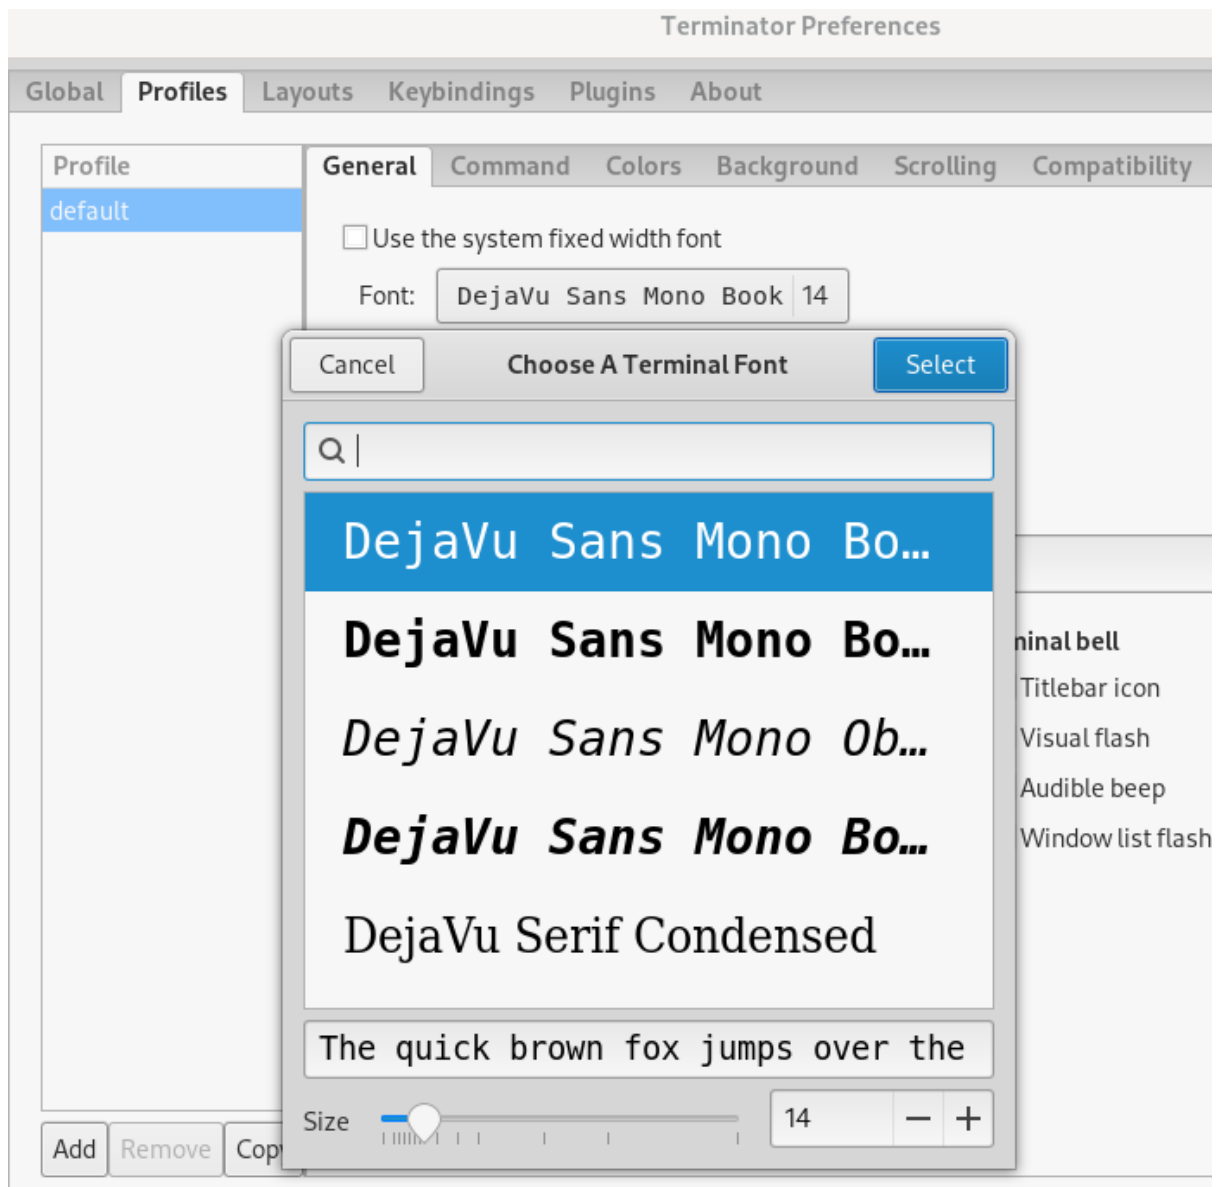

```
root@kali: ~/Documents
root@kali:~/Documents# apt-get install terminator
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
terminator is already the newest version (2.1.4-3).
0 upgraded, 0 newly installed, 0 to remove and 2 not upgraded.
root@kali:~/Documents#
```

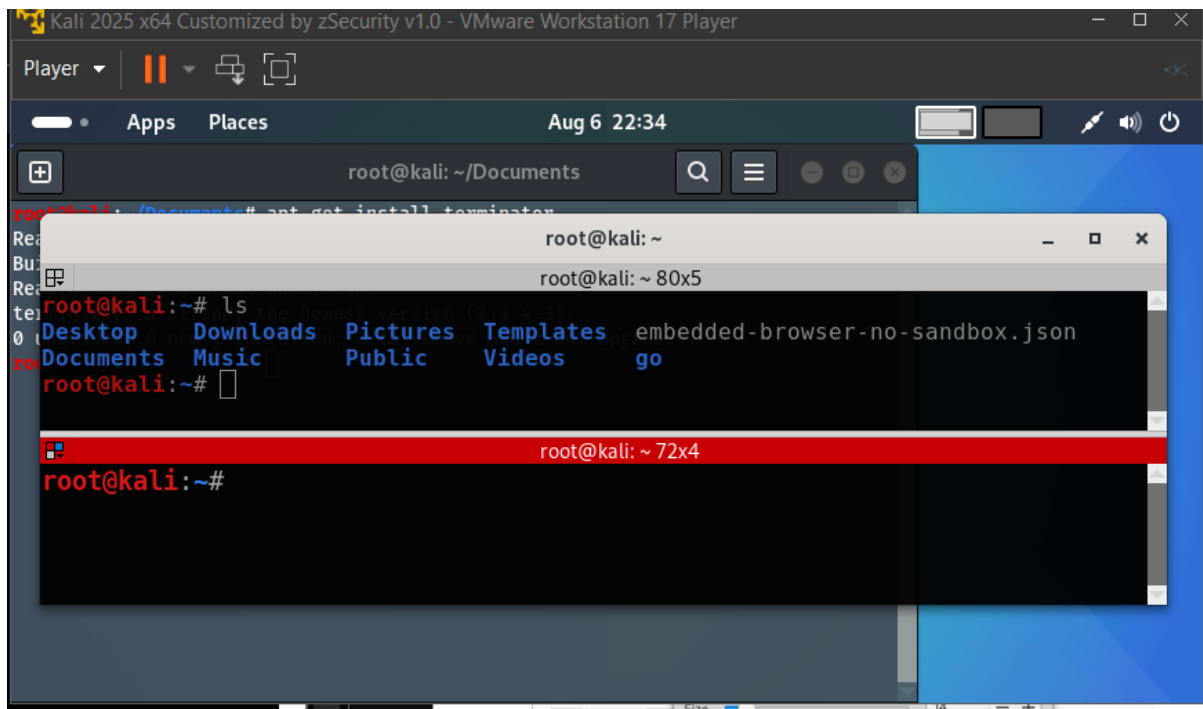

Terminator dan terminal bawaan linux sama sama mematuhi perintah perintah tertulis. Tapi terminator punya kemampuan lebih jika klik kanan ada banyak menu seperti gambar

Di preferences -> profile -> general -> font . tampilan seperti gambar dibawah

jika klik kanan dan klik split horizontal tampilan akan seperti ini

Itu muncul 2 bagian sama sama bisa digunakan untuk mengetik

Dan bisa juga muncul 3 seperti ini
